ADDITIONAL DATA AVAILABLE ON REQUEST

A range of unpublished data from the Survey of Employee Earnings and Hours (EEH) is available on request. If you wish to request unpublished data, a list of the populations and variables available, together with instructions on how to place an order, can be found on page 85 of this publication. A charge is made for this service. Should you like to discuss any requirements please contact Regina Camara in Canberra on (06) 252 5325.

SUMMARY OF FINDINGS

Overtime

In May 1990, average weekly total earnings for all full-time adult non-managerial males were 3.0 hours, and for females 0.7 hours. For this overtime, males

Care should be taken in interpreting estimates for managerial/non-managerial employees which are presented according to classification by occupation, as well as status of employee. See paragraph 10 of the Explanatory Notes (page 77). Because of methodological differences, estimates of average earnings from this survey vary slightly from the estimates obtained from the quarterly survey of Average Weekly Earnings (6302.0).

full-time non-managerial employees were recorded in Manufacturing and basic metal products, machinery, equipment and parts. Overtime earnings were recorded in

Distribution of Earnings

The median weekly total earnings for all male employees in May 1990 was \$518.30, while females recorded an estimate of \$361.50.

A significant element in the difference between the distributions of male and female total earnings is that the overtime earnings for males is considerably higher than for females. This difference is observed in both the private and public sectors. Other factors which also influence this difference are:

- a large proportion of females are employed part-time, and
- most managerial employees are male.

For full-time adult non-managerial employees, the median weekly total earnings was estimated at \$531.10 for males and \$445.20 for females.

Diagrams 1 and 2 show the distribution of weekly total and ordinary time earnings for full-time adult non-managerial employees by sector.

For full-time adult non-managerial males approximately 57 per cent of employees in the public sector and 47 per cent in the private sector earn an amount greater than the median total earnings in those sectors. The comparable proportions for females are 65 per cent in the public sector and 40 per cent in the private sector.

DIAGRAM 1: DISTRIBUTION OF FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES BY WEEKLY TOTAL EARNINGS, BY SECTOR, AUSTRALIA, MAY 1990

DIAGRAM 2: DISTRIBUTION OF FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES BY WEEKLY ORDINARY TIME EARNINGS, BY SECTOR, AUSTRALIA, MAY 1990

Composition of earnings

'Award or agreed base rate of pay' is by far the largest component of total earnings varying from 82.3 per cent for full-time adult non-managerial males in the private

sector to 98.0 per cent for full-time adult non-managerial females in the public sector.

The overall composition of earnings varies markedly between different types of employees, as illustrated in the following table.

COMPOSITION OF EARNINGS AS A PERCENTAGE OF AVERAGE WEEKLY TOTAL EARNINGS: FULL-TIME NON-MANAGERIAL EMPLOYEES, AUSTRALIA, MAY 1990

	Award or agreed base rate of pay	Payment by measured result	Overtime pay	Total ordinary time pay	Overtime pay	Total weekly earnings
— per cent —						
Adults-						
Males	86.0	1.3	2.3	89.5	10.5	100.0
Females	95.6	0.4	1.5	97.5	2.5	100.0
Persons	89.0	1.0	2.0	92.0	8.0	100.0
Juniors-						
Males	91.0	0.4	2.0	93.5	6.5	100.0
Females	96.1	0.1	1.2	97.4	2.6	100.0
Persons	93.5	0.3	1.6	95.4	4.6	100.0

The main difference in the composition of earnings for adult males compared to junior males is in overtime pay. For adult males it represents 10.5 per cent of total weekly earnings compared to 6.5 per cent for junior males. For

award or agreed base rate of pay the contribution to total weekly earnings is significantly lower for adult males (86.0%) compared to adult females (95.6%).

Overtime

In May 1990 average weekly total overtime hours paid for all full-time adult non-managerial males were 3.0 hours, and for females 0.7 hours. For this overtime, males received an average of \$60.30, while females received \$12.00.

At the industry level, the highest overtime earnings for full-time adult non-managerial employees were recorded in Mining (\$151.60) and Basic metal products manufacturing (\$95.90). Low overtime earnings were recorded in Community services (\$15.70) and Recreation, personal and other services (\$16.40).

Private sector employees worked more overtime than their public sector counterparts. In the private sector, full-time adult non-managerial males earned \$70.80 in overtime pay compared with \$41.20 in the public sector. For females the corresponding figures were \$13.80 in the private sector and \$9.40 in the public sector.

The major occupation group to record the highest average overtime earnings (for full-time adult non-managerial employees) was Plant and machine operators, and drivers (\$90.90), while Tradespersons earned \$71.10. In contrast, Salespersons and personal service workers earned \$15.50.

AVERAGE WEEKLY OVERTIME EARNINGS OF FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, SECTOR,
MAJOR OCCUPATION GROUPS, AUSTRALIA, MAY 1990
(Dollars)

Occupation	Private sector			Public sector			Total		
	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons
Professionals	18.20	6.60	13.70	28.90	6.80	17.90	24.40	6.70	16.30
Para-professionals	54.60	15.90	42.10	45.80	11.80	34.60	48.30	12.90	36.70
Tradespersons	82.90	17.60	79.00	47.10	14.10	45.50	74.40	16.80	71.10
Clerks	37.30	9.80	17.20	27.50	8.80	16.60	32.00	9.40	16.90
Salespersons and personal service workers	15.90	11.40	13.80	43.30	11.10	22.70	19.50	11.30	15.50
Plant and machine operators, and drivers	115.90	24.80	99.30	62.80	48.10	62.40	102.20	25.80	90.90
Labourers and related workers	78.90	25.90	65.00	44.40	11.40	35.40	69.50	21.80	56.80
All occupations (a)	70.80	13.80	51.30	41.20	9.40	28.70	60.30	12.00	42.90

(a) Includes occupation groups not shown separately above.

Males worked more overtime, on average, than females. Of those full-time adult non-managerial employees who received overtime pay, males worked an average of 8.2 hours for \$166.20, while females worked 4.8 hours for \$87.20. A similar pattern is evident across occupations and industries.

Between May 1989 and May 1990 the percentage of average weekly total earnings contributed by overtime decreased for full time adult non-managerial males and females. For males it decreased from 11.1 per cent to 10.5 per cent and for females from 2.8 per cent to 2.5 per cent.

This decrease was not across all industries however. In particular, the Retail industry and Paper, paper products, printing and publishing industry both reported increases in overtime earnings as a percentage of average weekly total earnings. The overtime contribution to average weekly total earnings for these industries increased from 4.5 per cent to 5.7 per cent, and from 12.3 per cent to 13.7 per cent, respectively.

Overaward Pay

Average weekly overaward pay for full-time adult non-managerial employees represented 2.2 per cent of average weekly ordinary time earnings in May 1990. Full-time adult non-managerial males earned an average of \$13.00 in overaward pay, representing 2.5 per cent of average weekly ordinary time earnings. The corresponding figure for females was \$6.90, representing 1.5 per cent of average weekly ordinary time earnings.

At the broad industry level (see Table 16) overaward pay for full-time adult non-managerial males was highest in the Paper, paper products, printing and publishing industry and the Fabricated metal products; other machinery and equipment industry. In these industries it represented 8.7 per cent and 6.7 per cent respectively of average weekly ordinary time earnings. For adult females it was highest in the same two industries representing 4.8 per cent and 5.1 per cent respectively of average weekly ordinary time earnings.

Differences between male and female overaward pay within industries were largest for the Paper, paper products, printing and publishing industry. Adult male and female overaward pay represented 8.7 per cent and 4.8 per cent of average weekly ordinary time earnings. In the Retail trade industry the percentages for overaward pay were 4.8 per cent for adult males and 1.4 per cent for adult females.

In the private sector, average weekly overaward pay for full-time adult employees was \$14.10 (with males receiving \$15.90 and females receiving \$10.40). This contrasts markedly with the public sector where the average weekly overaward pay for full-time adult employees was \$1.70.

The major occupation group to attract the highest level of overaward payments was Tradespersons - full-time adults in this occupation received \$20.80 on average. The occupation group with the next highest overaward pay was Plant and machine operators, and drivers who received \$12.50, while all other groups received less than \$10.00.

Between May 1989 and May 1990 there were slight decreases in the levels of overaward payments in the public sector for both males and females. In the private sector there was an increase of \$2.90 for males and \$1.80 for females.

In contrast to other occupations, overaward pay for Salespersons and personal service workers has not increased between May 1989 and May 1990. However, award or agreed base rate of pay for that occupation group showed an increase of 7.8 per cent.

AVERAGE WEEKLY OVERAWARD PAY: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, MAJOR INDUSTRIES AUSTRALIA, MAY 1990

AVERAGE WEEKLY OVERAWARD PAY: FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES, MANUFACTURING INDUSTRIES AUSTRALIA, MAY 1990

Earnings by Occupation

The highest average weekly total earnings for full-time adult employees were recorded in the following major occupation groups:

- Managers and administrators (males \$804.80, females \$610.90)

- Professionals (males \$760.50, females \$611.80)
- Para-professionals (males \$671.20, females \$587.60)

The estimated average weekly total earnings across all occupation groups for full-time adult employees is \$570.70 (see Table 5).

**PERCENTAGE CHANGE IN AVERAGE WEEKLY TOTAL EARNINGS: FULL-TIME ADULT EMPLOYEES,
MAJOR OCCUPATION GROUPS, AUSTRALIA, MAY 1986 TO MAY 1990**

Source: Table 5. 6306.0 1990 and Table 4. 6306.0 1986

The above graph shows the percentage change in average weekly total earnings between May 1986 and May 1990 for full-time adult males and females, by major occupation groups.

The occupation where the percentage increase is most marked between male and female earnings is Para-professionals. For this occupation group female earnings show an increase of over 40 per cent, which is well above the average. The male earnings increase is lower than average and is the smallest increase for males of the eight major occupation groups.

Other occupations where the percentage increase for female earnings is higher than for males include Tradespersons; Clerks; Plant and machine operators, and drivers; and Labourers and related workers.

Despite the improvement in female earnings within these occupations, overall the increase in total weekly earnings in this period for males was 31.8 per cent, marginally higher than for females (31.2%).

Occupation Group	1986 Earnings (\$)	1990 Earnings (\$)	Change (\$)	Percentage Change (%)
All occupations	570.70	720.00	149.30	25.9%
Managers and administrators	804.80	1010.00	205.20	25.5%
Professionals	760.50	910.00	159.50	20.7%
Para-professionals	671.20	820.00	148.80	22.1%
Tradespersons	587.60	720.00	132.40	22.6%
Clerks	530.00	640.00	110.00	20.7%
Salespersons and personal service workers	510.00	620.00	110.00	21.6%
Plant and machine operators and drivers	490.00	590.00	100.00	20.4%
Labourers and related workers	470.00	560.00	90.00	19.1%

Note: Based on a sample of 10,000.

EXPLANATORY NOTES

Introduction

This publication contains estimates obtained from a sample survey of employers conducted in May 1990. The survey is designed to provide statistics on the distribution of employees according to weekly earnings and hours, and on the composition of weekly earnings and hours for various categories of employees and principal occupations.

2. Preliminary estimates were published in *Distribution and Composition of Employee Earnings and Hours, Australia, May 1990, Preliminary* (6305.0) on 2 April 1991.

Scope of the survey

3. All wage and salary earners who received pay for the reference period are represented in the survey, except:

- members of the Australian permanent defence forces;
- employees of enterprises primarily engaged in agriculture, forestry, fishing and hunting;
- employees in private households employing staff;
- employees of overseas embassies, consulates, etc.;
- employees based outside Australia; and
- employees on workers' compensation who are not paid through the payroll.

4. Also excluded are the following persons who are not regarded as employees for the purposes of this survey:

- directors who are not paid a salary;
- proprietors/partners of unincorporated businesses; and
- self-employed persons such as subcontractors, owner/drivers, consultants and persons paid solely by commission without a retainer.

Survey design

5. A sample of approximately 9,400 employers is selected from the ABS register of businesses to ensure adequate State and industry representation. The statistical unit for the survey comprises all activities of an enterprise in a particular State or Territory. Each statistical unit is classified to an industry which reflects the predominant activity of the enterprise in the State or Territory. In a small number of cases where an enterprise has significant employment in more than one industry, a separate statistical unit is created for each industry. The statistical units are stratified by State, public/private sector, industry and size of employment, and a simple random sample is selected from each stratum.

6. Employers with fewer than 10 employees are required to complete details for every employee, while those with 10 or more employees are required to select a random sample of their employees in accordance with instructions supplied by the ABS. Data for approximately 83,000 employees was obtained in the survey.

7. Although the sample is not designed specifically to provide estimates of numbers of employees, it is estimated that 3,091,800 male and 2,425,800 female employees are within the scope of the survey. These and other estimates of numbers of employees included in this publication should not be taken as measures of total employment in the categories indicated.

Industry classification

8. Industry is classified according to the *Australian Standard Industrial Classification (ASIC) 1983 Edition, Volume 1 — The Classification* (1201.0). The following table shows details of the ASIC industries used in the publication (More detailed information may be available on request).

	<i>ASIC code</i>	
	Sub-	
	Division	<i>division Title</i>
B		Mining
C		Manufacturing
	21	Food, beverages and tobacco
	23,24	Textiles; Clothing and footwear
	26	Paper, paper products, printing and publishing
	27	Chemical, petroleum and coal products
	29	Basic metal products
	31,33	Fabricated metal products; other machinery and equipment
	32	Transport equipment
	25,28,34	Other manufacturing(a)
D		Electricity, gas and water
E		Construction
F		Wholesale and retail trade
	47	Wholesale trade
	48	Retail trade
G		Transport and storage
H		Communication
I		Finance, property and business services
J		Public administration and defence(b)
K		Community services
L		Recreation, personal and other services(c)

(a) Includes wood, wood products and furniture (subdivision 25); glass, clay and other non-metallic mineral products (subdivision 28); leather, rubber and plastic products and manufacturing not elsewhere classified (subdivision 34). (b) Excludes permanent defence forces. (c) Excludes private households employing staff (subdivision 94).

NOTE: Division A, (Agriculture, Forestry, Fishing and Hunting) is excluded from the survey.

Occupation

9. Occupation is classified according to the Australian Standard Classification of Occupations (ASCO), based on the title and description of the job.

10. Care should be taken when comparing survey estimates based on ASCO groups with estimates based on the managerial/non-managerial status of employees, which is determined and reported by the employer. Estimates for employees with manager status include employees classified to ASCO categories other than the ASCO major group 'Managers and Administrators'; e.g. employees classified as Professionals according to ASCO may be categorised by employers as having managerial status. Conversely, tables in this publication which contain estimates for non-managerial employees (as defined by employers) will include some employees who would be classified to the ASCO major group 'Managers and Administrators'.

11. Details of ASCO can be found in *ASCO: Statistical Classification — First Edition* (1222.0), and an *Information Paper: ASCO — Australian Standard Classification of Occupations, April 1991* (1221.0).

Comparability of results

12. Because of the substantially improved coverage of employers provided by the ABS register of businesses and modifications to some definitions, results from surveys conducted after 1981 are not strictly comparable with those for surveys conducted between 1974 and 1981.

13. Care should be taken when comparing the results of this survey with the quarterly series *Average Weekly Earnings, States and Australia* (6302.0), as a different sample design and survey methodology are used. The Average Weekly Earnings survey collects information relating to total employment of organisations selected in the survey, whereas results from the Employee Earnings and Hours survey are obtained in relation to a sample of employees within the organisations selected. In addition, the size of the sample for the Employee Earnings and Hours survey is much larger than that for the Average Weekly Earnings survey.

14. Because of the two stage sampling methodology used for this survey to arrive at a sample of employees, it is not possible to ensure that the representation of all the subgroups of interest in the sample accurately reflect their representation in the population.

15. Considerable care is taken in questionnaire design and in the instructions given to employers on how to select samples of their employees. All survey returns are subjected to careful editing to detect reporting errors, inconsistencies and transcription errors. Ultimately, however, the quality of survey results depends on the quality of the information provided by survey respondents and adherence to specified procedures.

Reliability of estimates

16. For information on the reliability of estimates see the Technical Note (Appendix A).

Related publications

17. Users may also wish to refer to the following publications which are available on request:

Information Paper: New Statistical Series: Employment, Average Weekly Earnings, Job Vacancies and Overtime (6256.0)

18. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Unpublished statistics

19. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, computer printout or clerically extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made to Regina Camara on Canberra

(06) 252 5325 or to Information Services in the nearest ABS office.

Symbols and other usages

* subject to high relative standard error.

See the Technical Note
(Appendix A).

20. Estimates of earnings shown in the tables are rounded to the nearest 10 cents, and those of average weekly hours paid for are rounded to the first decimal place.

21. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

APPENDIX A

TECHNICAL NOTE

Introduction

As the estimates in this publication are based on information relating to a sample of employers and employees, rather than a full enumeration, they are subject to sampling variability. That is, they may differ from the figures that would have been produced if the information had been obtained from all employers and all employees. This difference, called *sampling error*, should not be confused with inaccuracy that may occur because of imperfections in reporting by respondents or in processing by the ABS. Such inaccuracy is referred to as *non-sampling error* and may occur in any enumeration whether it be a full count or sample. Efforts have been made to reduce non-sampling error by careful design of questionnaires, detailed checking of returns and quality control of processing.

2. An asterisk appears against estimates in this publication where the sampling variability is considered too high for most practical uses. Generally, this indicates a relative standard error equal to or greater than 25 per cent of the estimate for Distribution tables and 10 per cent for Occupation tables.

Reliability of estimates

3. The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error*, which indicates the degree to which an estimate may vary from the value that would have been obtained from a full enumeration (the 'true' figure). There are about two chances in three that a sample estimate differs from the true value by less than one standard error, and about nineteen chances in twenty that the difference will be less than two standard errors.

4. Another measure of the sampling error is the *relative standard error*, which is obtained by expressing the standard error as a percentage of the estimate. Both measures are used in the following discussion of the reliability of the estimates.

5. As it is not practicable to include the standard errors of all estimates in this publication, Tables A, B, C and D have been produced to give an indication of the magnitude of relative standard errors.

Distribution (Tables 1-3, 6, 7, 12-15, 23, 24, 32)

6. These distribution tables are based on estimates of numbers of persons in various ranges of earnings and hours. Table A on page 80 provides an indication of the magnitude of the standard error of estimates of numbers of employees for different employment estimates. An example of the use of the table in relation to Table 1 is as follows: the estimate for the earnings range \$360.00 to \$380.00 for Victorian males is 3.5 per cent of the total

number of Victorian male employees. This represents approximately 30,900 males. The relative standard error of this estimate is 10.7 per cent (or approximately 3,300 males). There are about two chances in three that a complete collection would have given a figure within the range 27,600 to 34,200 and about nineteen chances in twenty that the figure would have been within the range 24,300 to 37,500.

Average earnings and hours (Tables 4, 5, 8-11, 16-22, 25-31, 33)

7. Tables B, C and D show relative standard errors for some estimates of average weekly earnings (both total and overtime). An example of the use of Table D is as follows: the estimated average total weekly earnings of full-time adult non-managerial males in the Retail trade industry is shown in Table 16 as \$469.20. Table D shows the relative standard error on this estimate to be 1.7 per cent (or approximately \$8.00). There are about two chances in three that a complete collection would give a figure within the range \$461.20 to \$477.20, and about nineteen chances in twenty that the figure would be within the range \$453.20 to \$485.20.

Occupation (Tables 5, 8, 19, 20-21)

8. Occupation or occupation groups for which the relative standard error is equal to or greater than 10 per cent are highlighted with an asterisk.

9. The following notes give indications of relative standard errors which are not covered above.

Private/public sector. Relative standard errors relating to estimates of the private or public sector only are generally slightly higher than those for the private and public sectors combined.

Full-time adult employees. Relative standard errors are approximately the same as for full-time adult non-managerial employees (Tables B, C and D).

Full-time adult managerial employees. Relative standard errors are slightly higher than those for full-time adult non-managerial employees (Tables B, C and D).

Part-time adult non-managerial employees. Relative standard errors are generally 4 percentage points higher for males and 2 percentage points higher for females than those for full-time adult non-managerial employees (Tables B, C and D).

Average weekly hours paid for. Relative standard errors of average weekly ordinary time hours paid for and average weekly total hours paid for are generally much lower than the corresponding figures shown in the table for average weekly ordinary time earnings and average weekly total earnings.

APPENDIX B

GLOSSARY

Adult employees are employees 21 years of age or over and those employees who, although under 21 years of age, are paid at the full adult rate for their occupation.

Award pay or agreed base rate of pay refers to the award pay or agreed rate of pay for ordinary time hours paid for. For employees covered by an award it includes all allowances (dirt, height, tool, etc.) and penalty payments (e.g. shift loadings) specified in the award. It excludes overaward pay and service increments not specified in the award. For employees not covered by an award, agreed base rate of pay is the agreed wage for ordinary time hours paid for.

Employees refers to all wage and salary earners (as defined in paragraphs 3 and 4 of the Explanatory Notes) who received pay for any part of the reference period.

Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

Industry is classified according to the Australian Standard Industrial Classification (see Explanatory Notes paragraph 8).

Junior employees are those employees who are not adults as defined.

Managerial employees are adult managerial, executive and professional staff, generally defined as those employees who are ineligible to receive payment for overtime, or, although subject to payment for overtime, are in charge of a significant number of employees in a separate establishment.

Mean (or average) earnings or hours refers to the amount obtained by dividing the total earnings or hours of a group (e.g. full-time employees) by the number of employees in that group.

Median earnings or hours refers to the amount which divides the distribution into two equal groups of employees, one half having amounts below the median and the other half having amounts above it.

Non-managerial employees are those who are not managerial employees as defined.

Occupation is classified according to the Australian Standard Classification of Occupations (ASCO) (see Explanatory Notes paragraphs 9 to 11).

Ordinary time hours paid for refers to employees' award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours of work,

and that part of annual leave, paid sick leave and long service leave taken during the reference period.

Overaward pay refers to amounts of ordinary time pay (regular or otherwise) that are over the award (e.g. attendance, good time-keeping, profit-sharing, etc.). It excludes payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash).

Overtime hours paid for refers to hours in excess of award, standard or agreed hours of work.

Part-time employees are those who are not full-time employees as defined.

Payment by measured result refers to earnings which vary according to measured performance (e.g. piecework, production and task bonuses, and commission).

Percentiles refer to any of a hundred divisions of an earnings or hours series. For example, 25 per cent of employees earn less than or equal to the 25th percentile and 75 per cent of employees earn less than or equal to the 75th percentile.

Reference period for the survey refers to the last pay period ending on or before 18 May 1990.

Sector. Public sector includes local government authorities and all government departments and agencies created by, or reporting to, the Commonwealth or State Parliaments. All remaining employees are classified as private sector.

Size of firm. The size classification reflects total number of employees of an enterprise in a particular State/Territory and not necessarily the size of an enterprise Australia wide.

Weekly ordinary time earnings of employees refers to one week's earnings for the reference period attributable to award, standard or agreed hours of work. It is calculated before taxation and any other deductions (e.g. superannuation, board and lodging) have been made. Included in ordinary time earnings are award payments, base rates of pay, overaward payments, penalty payments, shift and other allowances; commissions and retainers; bonuses and similar payments related to the reference period; payments under incentive or piecework; payments under profit-sharing schemes normally paid each pay period; payments for leave taken during the reference period; all workers' compensation payments made through the payroll; and salary payments made to directors. Excluded are overtime payments, retrospective pay, pay in advance, leave loadings, severance pay, termination and redundancy payments and other payments not related to the reference period.

Weekly overtime earnings of employees refers to payment for hours in excess of award, standard or agreed hours of work.

Weekly total earnings of employees is equal to weekly ordinary time earnings plus weekly overtime earnings.

Weekly total hours paid for refers to the hours for which payment was made. It comprises ordinary time hours and overtime hours converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the reference period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial employees.

overtime hours. For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the reference period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial employees.

APPENDIX C

ADDITIONAL DATA AVAILABLE ON REQUEST

A range of unpublished data is available from the Survey of Employee Earnings and Hours on request. The populations and variables available are listed below.

A. POPULATIONS

The variables listed below are available in respect of each of the following populations:

B. VARIABLES

The following variables are available from this survey (subject to the reliability of the estimates).

Composition of earnings

Average weekly total earnings
 Average weekly ordinary time earnings
 Award or agreed base rate of pay (includes allowances)
 Overaward pay
 Payment by measured result
 Overtime

Sector

Private sector
 Public sector

 Persons

Occupation	Size of firm (number of employees)
ASCO major group (as shown in Table 2)	Under 20
	20 - 49
ASCO minor group (2 digit codes as shown in Table 19)	50 - 99
ASCO unit group (4 digit codes as shown in Table 20)	100 - 499
	500 - 999
	1,000 and over

C. HOW TO PLACE AN ORDER

Firstly, determine the population (from A above) and the variables (from B) that you require estimates for. A covering letter indicating these requirements and the uses of the data requested should be returned to:

Assistant Director
Labour Income and Disputes Sub-section (W41c)
Australian Bureau of Statistics
P.O. Box 10
Belconnen ACT 2616

If you wish to discuss individual requests, especially in regard to the reliability of estimates for particular cross-classifications, before you place an order please phone Regina Camara on Canberra (06) 252 5325.

Requests can be sent by facsimile to (06) 251 5486.

LABOUR STATISTICS AUSTRALIA, 1989

(Catalogue No. 6101.0)

This publication provides a wealth of information, including time series statistics, on the Australian labour market in tabular and graphical forms. Selected features highlight some of the more significant elements and trends.

Aspects of the Australian labour market covered in the publication include:

- socio-demographic characteristics of the labour force
- employment, unemployment and underemployment
- persons not in the labour force
- award rates, labour costs and employment benefits
- hours worked, industrial relations, training expenditure
- international comparisons.

To order your copy, please complete the order form below and forward to:

Freepost 8
Collector of Public Moneys
Australian Bureau of Statistics
P.O. Box 10
Belconnen ACT 2616
(No stamp is required if posted in Australia)

This 166-page publication can be also obtained from the ABS Bookshop in your state capital city for \$25.00.

For more information about this publication contact Mr Alan Sharp on (06) 252 7361

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our AUSSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
